

Dr Deepak Jadon

Consultant Rheumatologist, Cambridge University Hospitals

Dr Deepak Jadon is a consultant rheumatologist, Director of the Rheumatology Research Unit, and lead for psoriatic arthritis (PsA) at Addenbrooke's Hospital, Cambridge.

Having grown up in Cardiff, he graduated from the University of Wales College of Medicine in 2003, and then undertook clinical training in rheumatology and general internal medicine in Bath and Bristol between 2007-2015. He completed his PhD thesis on 'biomarkers of psoriatic arthritis phenotypes' at the Royal National Hospital for Rheumatic Diseases (Bath, UK) in 2015.

Deepak has particular expertise in the investigation and management of psoriatic arthritis (PsA), ankylosing spondylitis (AS), spondyloarthritis (SpA) and rheumatoid arthritis (RA). He is qualified in the use of musculoskeletal ultrasound.

Deepak is Director of the Rheumatology Research Unit at Cambridge University Hospitals NHSFT (Addenbrooke's Hospital), where he leads a team of 5 research nurses, 3 rheumatology fellows, and 2 administrators. They are currently performing >20 clinical trials / studies of novel cutting-edge medications for the treatment of arthritis and other rheumatological diseases.

He is an Associate Principal Investigator in the Department of Medicine at the University of Cambridge. His research interests include genetic and serum biomarkers of PsA, AS and SpA, in particular those that predict prognosis.

Deepak is Theme Lead for E-learning at the University of Cambridge Clinical School, delivering high quality online learning to year 4-6 medical student.
